ProjectForge AI UML Sequence Diagram

Figure 2.4(a) Creation understanding and clarification

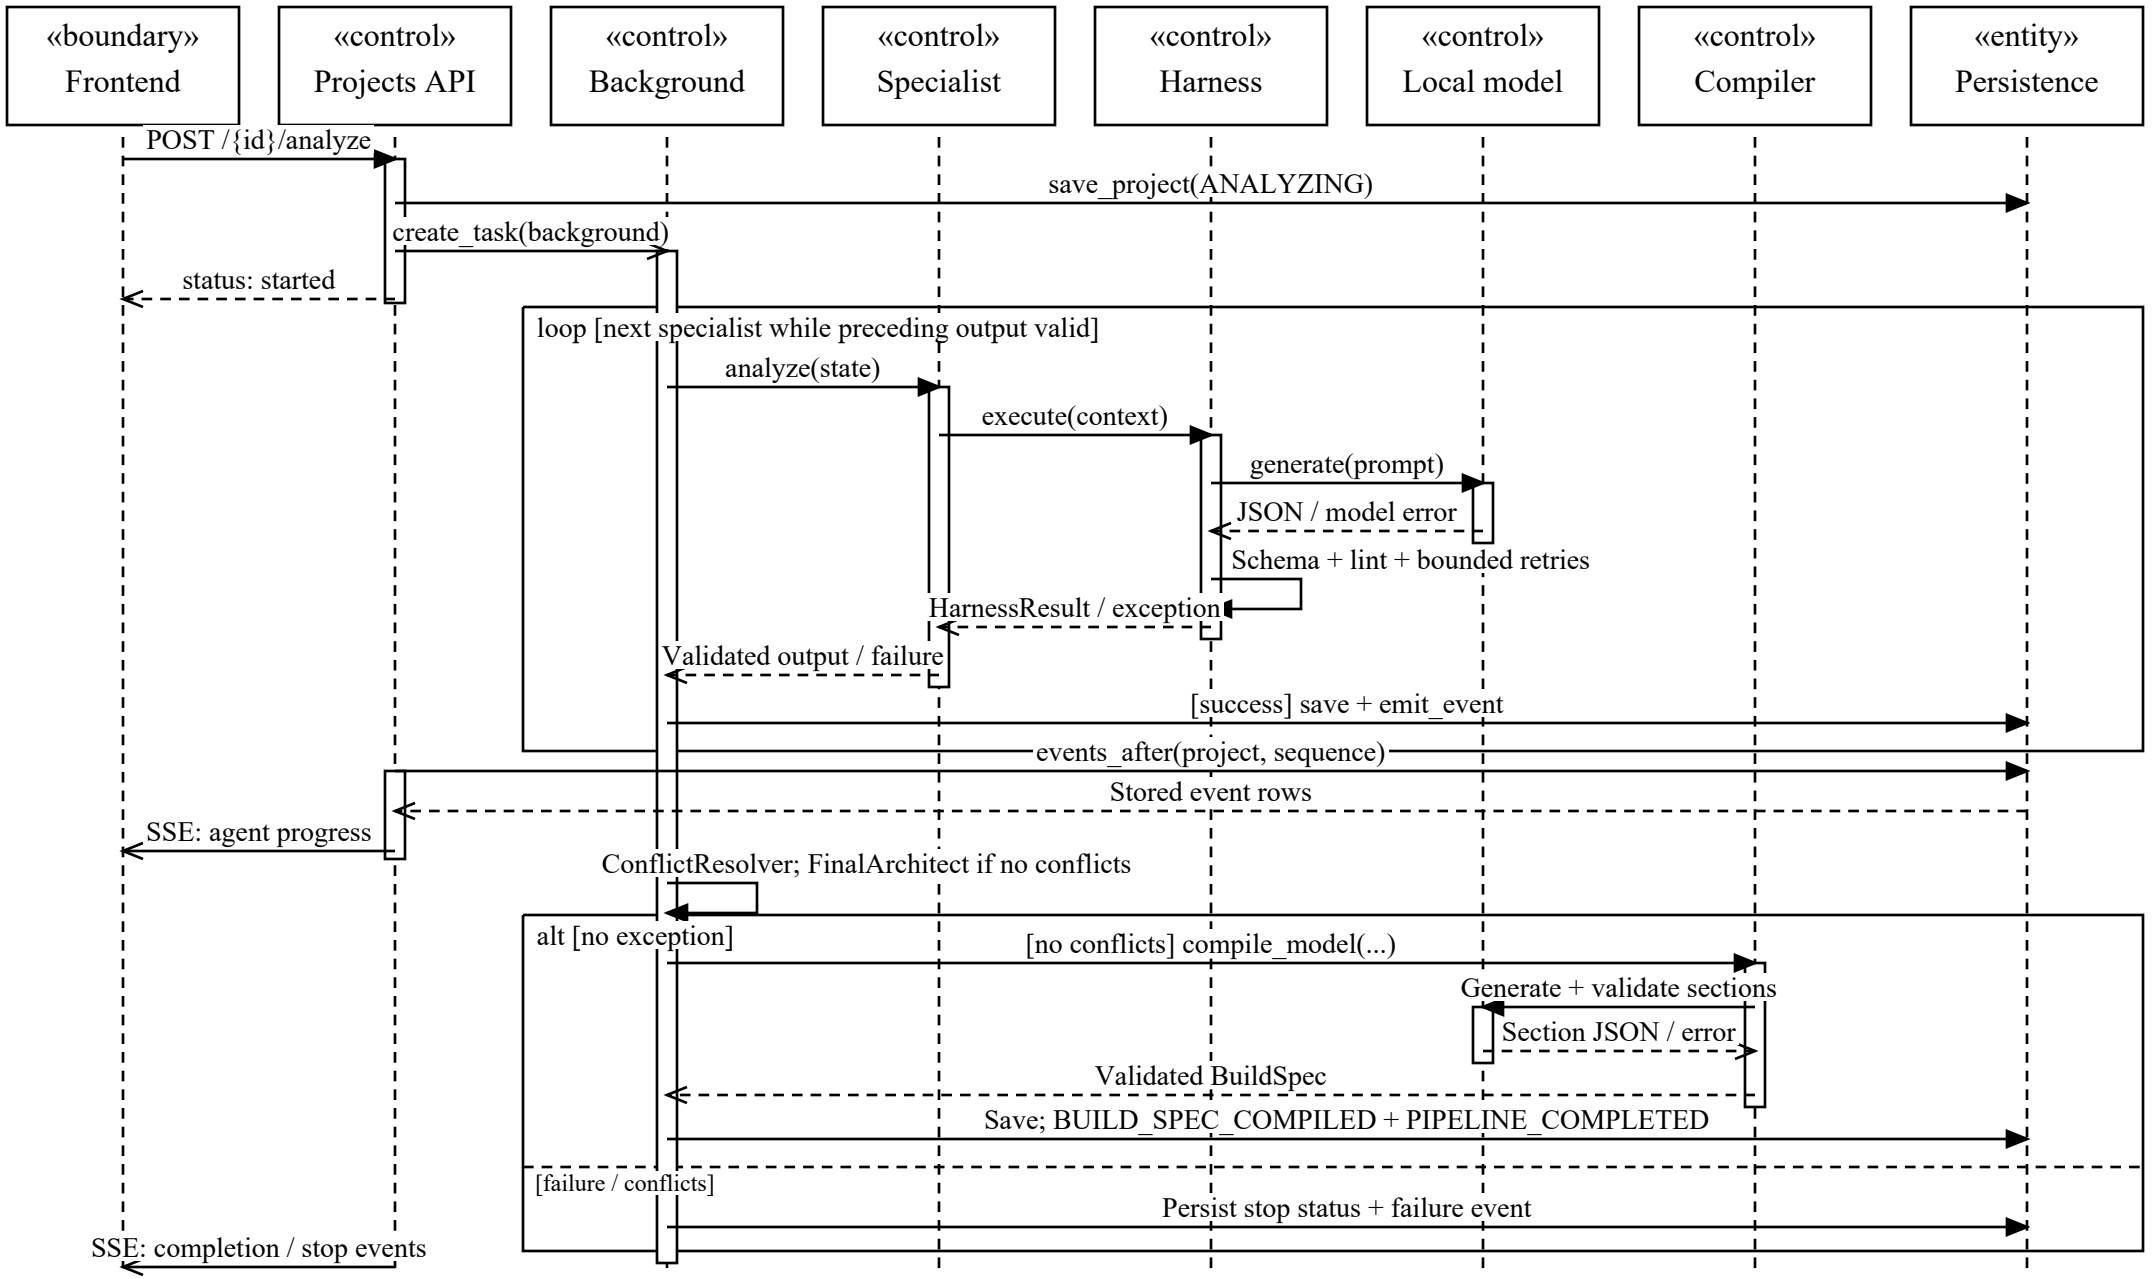

Clarify updates the pending-question list; it does not re-run RequirementEngine. emit_event persists before responses.

Filled arrow: call | Open arrow: asynchronous message | Dashed arrow: return | Narrow rectangle: activation

ProjectForge AI UML Sequence Diagram

Figure 2.4(b) Background planning and failure outcomes

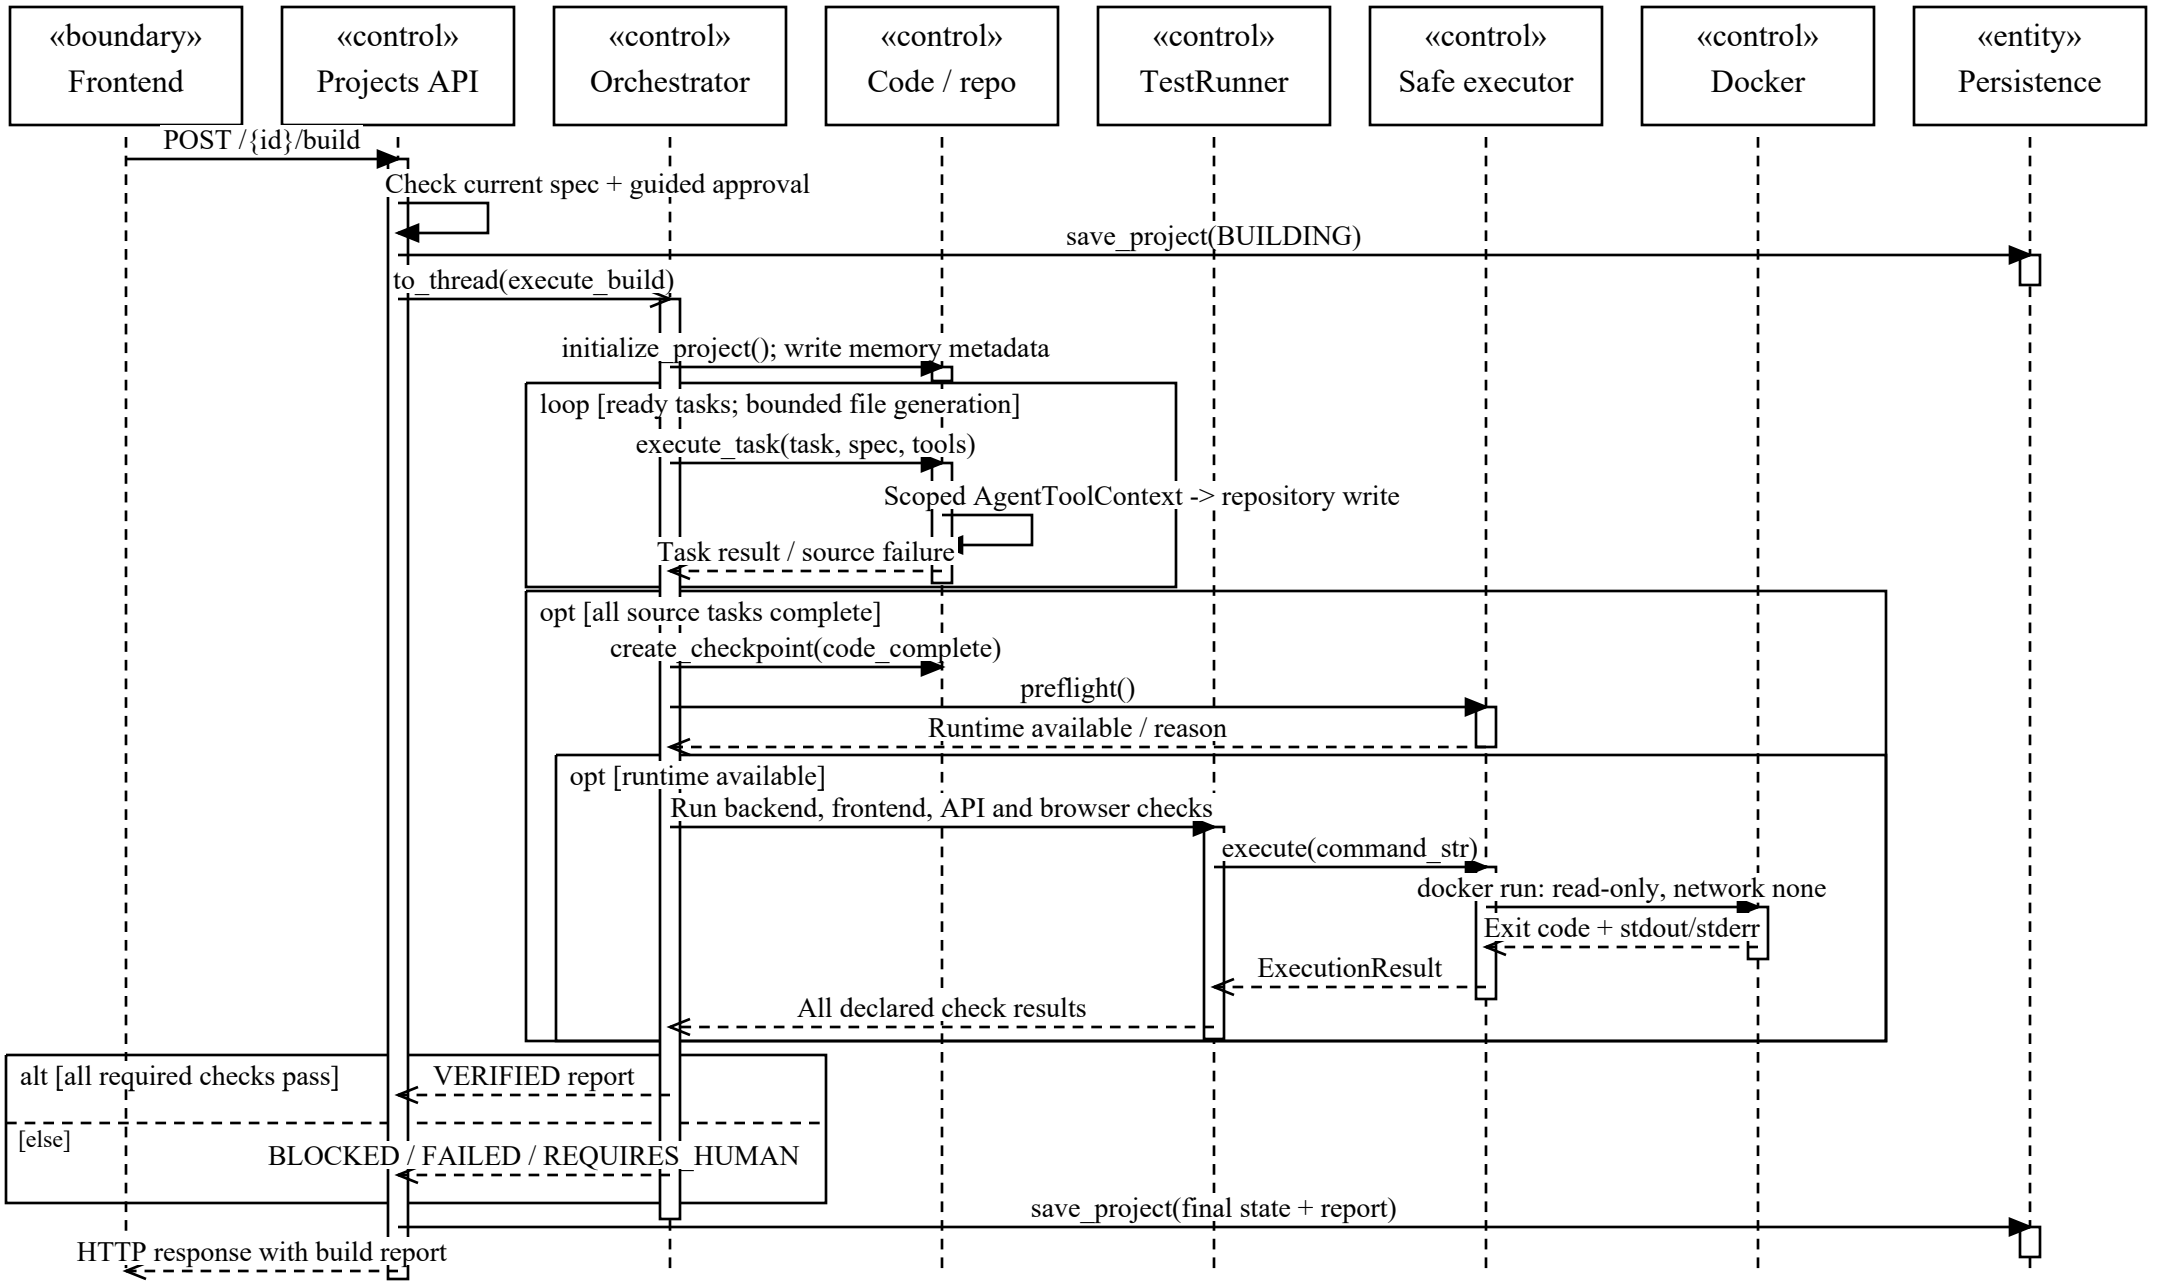

API /stream reads events_after() and emits SSE; emit_event appends events, signals waiters and saves snapshots.

Filled arrow: call | Open arrow: asynchronous message | Dashed arrow: return | Narrow rectangle: activation

ProjectForge AI UML Sequence Diagram

Figure 2.4(c) Awaited build worker and persisted outcomes

API awaits shield(worker). Graph/scheduler are local. Orchestrator invokes SelfHealingLoop only after backend test failure.

Filled arrow: call | Open arrow: asynchronous message | Dashed arrow: return | Narrow rectangle: activation
